I strongly believe that education is the right vehicle to spread and sustain democracy. Citizens Association for Childs rights (CACR) is doing a fantastic job by not only working towards education but also children health. Lotus College of optometry has been associated with CACR since 2015 and we deeply appreciate the team work carried out by members of CACR who strive hard from the wee hours of the morning to make sure every child is educated and has appropriate health care management.

Final year optometry students of Lotus College of Optometry have helped them in screening school children in various BMC schools across Mumbai. Till date, school screening camps have been conducted at various municipal schools like, Tank Lane Municipal School, H P Keluskar Municipal School, Dixit Road Municipal School and Petit Municipal School. Over 2000 school children have been screened, over 100 have been prescribed with spectacles and around 80 have been referred to base hospital for further evaluation.

We are impressed by the initiatives taken by the team of CACR to ensure that no child goes without education and eye care services. This in turn helps to make child equally skilled to achieve gainful employment and managing avoidable blindness.

On behalf of Lotus college of Optometry we wish to continue to support CACR for their noble cause and also wish to continue to receive support in near future.
